# Construction Products Regulations

North Yorkshire Plant Hire LTD's compliance with the Construction Products Regulations (CPR) in the UK involves several key steps. Here's an outline of how we can demonstrate this compliance, particularly concerning UKCA and UK(NI) Marking:

1. **Understanding the Regulations:** North Yorkshire Plant Hire LTD is familiar with the Construction Products Regulations, specifically legislation related to UKCA and UK(NI) Marking. This includes knowing what products are covered and what requirements they need to meet.
2. **Product Assessment:** North Yorkshire Plant Hire LTD conduct a thorough assessment of all construction products used by our company at the time of purchase, This determine whether they fall under the scope of the CPR and identifies the specific performance characteristics.
3. **Testing and Evaluation:** Check that manufacturers have obtained the necessary testing and evaluation for your products. This may involve:
  - Third-party testing by a UK designated or an accredited laboratory.
  - Internal testing where permissible, in line with harmonized standards.
4. **Labeling:** Ensure that all applicable products are correctly labeled with the UKCA or UK(NI) mark. This marking must be affixed visibly, legibly, and indelibly to the product, packaging, or accompanying documents.
5. **Staff Training:** Provide training for employees involved in product development, quality assurance, and compliance processes to ensure they understand their roles in maintaining compliance with CPR and the importance of UKCA/UK(NI) marking.
6. **Regular Audits and Reviews:** Conduct regular internal audits and reviews of processes and documentation to ensure ongoing compliance with the CPR. Make necessary adjustments based on audits or changes in legislation.

By following these steps, an organisation can effectively demonstrate compliance with the Construction Products Regulations in the UK, ensuring that products are safe and meet the required performance standards.

The policy will be reviewed annually from implementation

Approved 9/8/24
